To : Mr.Natraj
Product Specialist
Universal Oilfield Maint.Co
Sultanate of Oman

This letter is to certify the usage of Omega Products in our plant over the last one year as per the applications listed below :

Omega Code	Applications	Observations
Omega 85 – SSP Grease	Exhaust Fans – Plummer Blocks 6215 NU 215	Resists Contaminants, No Melting, and a user friendly grease
Omega 99 – Anti-Seize	Used in Boiler fasteners	Easy Dismantling
Omega 77 – EP2 Grease	Boiler Feed Water Pump	No Re-greasing last 4 months
Omega 636 – Jamaican Oil	Pump sleeve shaft dismantling - soaked in a bath of Omega 636	Omega 636 Maint.Oil supercedes WD-40

Besides, we also use **Omega 22, 699, 690, 95, 57 and Magicor** hand cleaners. The updates for these products would be certified soon after we obtain feedbacks.

Omega products are certainly high priced and is a product which may not need comparison. However, the best way to get started to test these products would be with small trial packs with critical applications.

Best Wishes

Jalal A. Abu Dabaseh
Chief Engineer
